"for anyone looking to configure a cloud solution with great customer service and support, *effortless office* is the perfect solution."

**simple!**

Eva Liang, M.D.,  
FOUNDER OF CENTER  
FOR SIGHT & SIGHT FOR LIFE

"Providing our patients the optimal experience for something so vital as their vision means that we focus on our patients – rather than our IT, and *Effortless Office* makes this possible. From a complex electronic medical records system and proprietary software to hundreds of scanners, printers, phones, and other devices our setup is by no means simple, but with the crew at *effortless office* standing by, it feels simple. Even with our expansion from one office to four offices, it truly was effortless. Using their remote desktop product allows us to turn on our IT each morning as easily as we turn on the lights. Thank you Effortless Office!"

Greg Keh  
CEO TWI GROUP

"*effortless office* and their entire team is a perfect example of teamwork, dedication and partnership. Their entire team is focused on results, their technologies allow us to meet leading edge standards at a fraction of the cost and their partnership and commitment to our success is of the highest value. It is very rare to have all these components today and we are happy to recommend *effortless office*."

**vital!**

Richard Faircloth  
VP, CHIEF INFORMATION OFFICER  
THE NEW TROPICANA LAS VEGAS

"when the new Tropicana Las Vegas launched its \$200 million transformation in 2009, information technology was among the necessary property enhancements... after conducting comprehensive research of potential companies that could provide support for our network, systems and help desk, we signed a (six-month) contract with *effortless office*. it was a decision that we would not regret.

as the six-month contract came to a close, we made the executive decision to continue our contract. I am thrilled to say that *effortless office* remains vital to our all-new resort and has become a part of the new Tropicana Las Vegas family."
